

RPE – Protection & Guidance

Download Documents Available

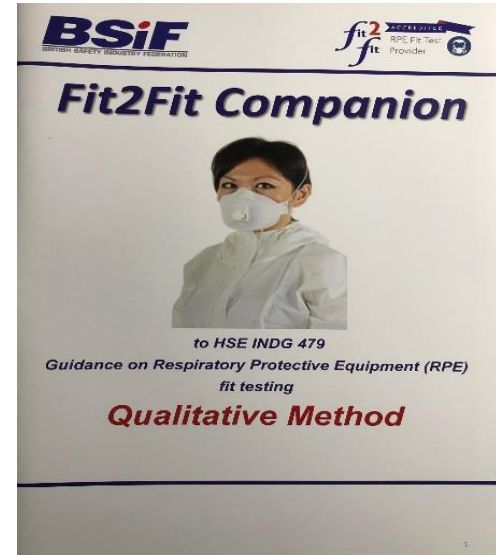

- COSHH 2002 - Reg. 7
- INDG479 – HSE Fit Testing Guidance Notes
- HSG 53 – Respiratory Protective Equipment at Work
- EH40 – Workplace Exposure Limits

How often do you fit test ???

- It is recommended every 2 years
 - (Fit2Fit Companion)
 - **Or within this time -**
- Company policy
- Significantly gain or lose weight
- Undergo any substantial dental treatment
- Any facial changes
- Change of RPE

Welding Fume : Protect your workers

- **Use suitable respiratory protective equipment (RPE)**
- When you provide RPE for your workers:
 - **Use an FFP3 disposable mask or half-mask with P3 filter for work of up to an hour**
 - Use battery-powered air-fed protective equipment for longer duration work, with a minimum assigned protection factor of 20 (APF20)
 - Ensure RPE wearers are clean shaven and provide face-fit test for them

AlphaFlow AMF-3CV & 3V (P3 Protection) APF 20

- Large surface area ensures very low breathing resistance.
- New large exhalation valve which reduces heat build up and improves wearer comfort
- Metal-free - suitable for food industry applications
- Preformed nose-bridge eliminates the need for regular adjustment
- Colour coded alphamesh shell for ease of identification
- *LOWEST BREATHING RESISTANCE MASK ON THE MARKET*

BSIF / HSE accreditation scheme

- BSIF / HSE Fit2Fit Training Scheme
- Ensure all HSE 'Testers' have all been through an RPE training program
- Alpha Solway team all fully 'fit2fit' accredited
